# Stallion Match Explained

The Stallion Match page shows Graded Stakes Winners from around the world that have a similar pedigree to your proposed mating. Based on the concept of “Dig for Gold where Gold has been found before”, it makes sense that your breeding plans should look to replicate pedigrees of champion runners and the analysis should look at the entire pedigree.

## Results List

This list will appear on the left side of the page after you click the “Match Similar Pedigrees” button. It shows Graded Stakes winning horses that have a similar pedigree to your proposed mating

### Graded Stakeswinners with same pattern

HORSE	G1	G2	G3	E	CSI
Sessions	0	1	0	0	26
Renaissance	0	1	0	0	26
Gamay	0	0	1	31	26
Arcadia Queen	1	2	1	46	22
Kementari	1	1	1	15	22
Levendi	1	1	1	46	22
Benfica	1	0	0	0	22
Pinwheel	0	2	2	0	22
Wawail	0	1	1	15	22
Messene	0	1	0	15	22

## Results List Columns

CSI or “Common Similarity Index” is a measure of how close the pedigree of the Graded Stakes Winner matches the hypo-mating. In general, values above 18 indicate a strong similarity. As a rule of thumb, if the results list shows 4 or more horses with CSI of 18 or above, it is usually a good mating. If it shows 2 or more horses with CSI above 20, it is usually an exceptional mating. (The Results List is sorted by the CSI column, so the closest matches will appear at the top.)

## Exact Matches

E is for “Exact” matches - this column shows a count of the number of ancestors in the 5-gen pedigree which appear in Exactly the same position.

## A 20/20 Mating

A 20/20 mating occurs when a pattern has two or more Graded Stakes Winners with CSI values above 20. This indicates that this pedigree is exceptional as there are at least two superior horses with a very similar pattern. In most cases the stud farm will offer special incentives for the breeder to send their mare to the selected stallion.

## A Perfect Match

A Perfect Match occurs when the hypothetical mating has at least one ancestor in common in every quartile (Sire side – Q1 & Q2, Dam side – Q3 & Q4) with the stakes winning horse it is matched against.

## Rating Explanation

Each hypothetical mating is rated based on its Impact Profile and the amount of positive & negative ancestral affinities. The rating is in the order:

- Outstanding
- Excellent
- Good
- Neutral
- Poor

# Impact Profile Explained

The G1 Goldmine Impact Profiles are purely pedigree based and produces 20 individual rating scores for the range of pedigree cross-matches for each yearling. The data is based on stakes winning results from all over the world. Each cross generates an Impact Score (IS) rating and each rating is then color-coded to show you positive and negative ratings.

The Impact Score measures the strength of a cross between two ancestors by comparing how many stakes winners it should have got (based on a complex and carefully calibrated formula) to how many stakes winners it actually did get. Higher ISs should be sought by buyers and lower ISs avoided

**Red** is negative and means that the pedigree cross has produced below expectations

**White** is neutral and means pedigree has produced at expectations

**Green** is positive and means that the pedigree cross has produced above expectations

**Gold** is super-charged and means that the pedigree cross has produced well-above expectations

**X** means there is not enough data or no data for that pedigree cross

The colour-coding system is there to act as a guide - gold results show that the pedigree match in question has produced stakes winners at a greater rate than expected given all factors being equal. A red result shows that the pedigree (whilst producing stakes winners) has done so at a rate lower than expected.

## Profiles you should try and breed or buy

CROSS COUNTER	TEOFILO	GALILEO	SADLER'S WELLS - Q1	DANEHILL - Q2	VICTORIAN QUEEN - Q2
